ATTENTION!

Use only for its intended purpose. Caution should be taken, the product has got sharp edges.

1. Use

The product is designed to be used with competition indicator boards for long and triple jumps. It is to help judges to quickly form plasticine on the indicator boards.

2. Technical specification

Product code	K9-250
Name	plasticine forming knife model 2020
Use	forming plasticine on indicator board K8-250
Material	synthetic material and stainless steel
Dimensions [mm]	220 x 60 x 15
Net weight [kg]	0,05

3. Operation

To mend deformed plasticine stripes, place the indicator board on an even surface or the wide table of the recommended cart PIC14-6 (available separately), dents and defects in the plasticine layers are filled up with thick layers of plasticine and then are to be leveled with the forming knife, as it is shown below.

4. Storage

The product should be stored in a dry roofed place.

5. Maintenance

The product should be cleaned regularly with commonly available detergents, that do not react with stainless steel and synthetic material.

6. Declaration
